SHADE & ORNAMENTAL TREES

ACER - MAPLE (cont.)

Norway (green leaf) - platanoides

This wonderful group of trees is not used as much as it should be! They are easy to transplant in fall or spring and are well adapted to extremes in soils. Norway maples will withstand sand, clay, acid to calcareous soils as well as hot and dry conditions. Don't plant Norway maples in low, wet areas. Consider using these great trees in parks, large open common areas or wide parkways.

Deborah: reddish-purple in spring & yellow in fall

Emerald Lustre: yellow fall color

Emerald Queen: green with a red tint in spring

Parkway: yellow fall color
