

DIG CHART

This chart is meant to be a resource to aid you in digging and scheduling your jobs. Please note that these are guidelines, not absolutes. Many factors out of our control, including weather and ground moisture, can affect successful digging & transplanting. All of our plants are dug when it is safe. Some plants are for immediate pick up, while many others are dug, placed into our HDC yards and properly maintained throughout the season.

Safe
Plants should respond well to digging.

Caution
There is a risk factor. Caution should be used to ensure successful digging & planting.

Use our HDC
Not safe to dig at this time. Use 1 of our convenient above ground holding yards. They're full of plants that were dug at the right time!

	Mar	April	May	June	July	Aug	Sept	Oct	Nov
Acer campestre/Hedge Maple	Orange			Green	Green	Green	Green		
Acer x freemanii/Red-Silver	Orange			Green	Green	Green	Green		Orange
